Interested? Send us your resume at jobs@tremend.ro, mentioning the following code in the email subject: I-BA-2020

Embedded Linux Software Engineer

What you'll do:
- Work closely with senior developers
- Implement software running under Linux in an embedded environment
- Write code in C, C++, Qt, which will be delivered to the customer
- Test the developed modules on prototype hardware
- Work and have fun within the team

We will definitely appreciate if you have:
- Very good C programming skills
- Familiarity with using and programming under Linux operating system
- Passion for UNIX and Open Source technologies
- Write C and C++ code for real hardware that will be delivered to thousands of users worldwide
- Fluency in English, both written and spoken
- Positive and can-do attitude

Interested? Send us your resume at jobs@tremend.ro, mentioning the following code in the email subject: I-EMB-2020

Chip Design Verification Engineer

What you'll do:
- Learn the principles of functional verification
- Learn dedicated OOP hardware verification languages
- Work in a multicultural team
- Facilitate a bug-free design by developing a state-of-the-art verification environment

We will definitely appreciate if you have:
- Functional verification background
- Knowledge of OOP
- Knowledge of Digital Circuits
- Fluent in English, both written and spoken
- Positive and can-do attitude

Interested? Send us your resume at jobs@tremend.ro, mentioning the following code in the email subject: I-ASIC-2020

Chip Design Backend Engineer

What you'll do:
- Learn the principles of Backend Design
- Work in a multicultural team
- Learn how to build a chip from RTL to production (GDS)
- Perform synthesis, Place & Route
- Perform signoff flows: Timing signoff, DRC & LVS signoff
- Facilitate the development of a state-of-the-art Backend environment by writing and/or improving flow scripts

We will definitely appreciate if you have:
- Backend chip design background
- Knowledge of scripting (TCL, Perl, etc.)
- Knowledge of Digital Circuits
- Knowledge of Spice, OrCAD tools and/or PCB projects
- Fluency in English, both written and spoken
- Positive and can-do attitude
